

SG - 500

Ultra High Temperature Grease

GENERAL DESCRIPTION :

SG-500 is specifically designed for the lubrication to Kiln car, wheel bearings and other high temperature applications.

At high temperatures the fluid base carrier dissipates leaving a layer of lubricating solids, which prevent galling and seizing. This product contains **Fluorinated Ethylene Polypropylene (PTFE)**.

Propylene and other lubricating solids, which enable SG-500 to pass a 1400° F. Pipe thread anti-seize test.

PROPERTIES :

- Colour Silver
- Texture Slightly tacky
- NLGI Grade 2
- Dropping point None (Non-Melting)
- Freezing point -30° F.
- Operating Temperature -30⁰c to 760⁰c
